

2024 LEGISLATIVE AGENDA

FOSTERING A ROBUST ECONOMIC ENVIRONMENT WHERE BUSINESSES THRIVE

✦ We support tax policies and economic development tools (CIDs, Development Authorities, etc.) that encourage investment and global competitiveness and will create more jobs for our region. We will advocate for policies that support innovation, entrepreneurship, and the growth of North Fulton's small business community.

✦ North Fulton is home to world-class healthcare facilities that support our region's health & wellness. Supporting approaches that will create marketplace certainty and continued investment from our providers without limiting small business growth or access to affordable healthcare is essential for our region to thrive.

SUPPORTING OUR INFRASTRUCTURE TO GROW AND CONNECT THE REGION

✦ The future of our region will require transportation infrastructure that meets the needs of our businesses and community. We support state and federal funding that aligns with the region's growth and allows for the construction of Express Lanes and Bus Rapid Transit on both Georgia 400 and the top end of I-285, as well as funding that supports innovative transportation solutions.

✦ Access to water, power, and broadband are essential for businesses in North Fulton to grow and compete. We support policies that will allow for the expansion of these critical infrastructure assets that serve North Fulton businesses and residents.

DELIVERING EFFECTIVE EDUCATION WITH BUSINESS PARTNERS

✦ A well trained and educated population is the foundation for any business to succeed. Gwinnett Technical College's Alpharetta campus is the center-point for educating, training, and building a 21st century workforce that meets the needs of businesses in the community. We support state funding that will allow for the expansion of the Alpharetta campus through the addition of a second building that will meet the demand of students and businesses.

✦ North Fulton's K-12 education system challenges our future workforce through innovative curriculum and programming. Continued alignment with the business community is essential for the success of our region. We support policies and state funding initiatives that will allow North Fulton's K-12 educational institutions to more deeply align with the skill sets needed by businesses.
